Client Case Study: **ONSITE SOURCING RESOURCE**

## ▼ Challenge:

- **Several large and simultaneous construction and renovation projects were slated for completion within a short period of time.** A shortage of qualified staff in the Supply Chain function was accompanied by a freeze on new FTE hires. The need to track vendor accountability was especially critical.

## ▼ Solution:

- **TractManager's Negotiation Services team placed experienced personnel on-site to manage and support supply chain functions through our Onsite Sourcing Resource solution.** All phases of the construction and renovation projects were managed, including planning, design, construction, purchasing, delivery, installation, and activation.

## ▼ Impact:

- **Projects were completed on time and under budget, and purchases were made at the lowest possible price.** Negotiation Services added more staff as the workload warranted, and vendors were tracked and held accountable during the entire process.

**\$5.2M SAVINGS**
