

# Integrated Provider Management Technology

## Increase Speed to Revenue by Conducting Provider Contracting & Onboarding Together

Start generating reimbursements for services faster by combining provider contracting and provider onboarding. When provider contracting, credentialing, enrollment, privileging, and compliance activities are conducted manually by several departments that don't communicate with one another, provider onboarding takes significantly longer, and the delays are costly.

TractManager has integrated two of its core technologies, MediTract CLM, the gold standard in healthcare contract lifecycle management, and CARE, our cloud-based credentialing, privileging, and enrollment software. This integration allows healthcare organizations to realize more revenue, faster

**We've integrated our two proprietary technologies to give you a single source of truth for provider management.**

### TractManager's MediTract CLM:

MediTract CLM is the only patented healthcare-specific CLM solution designed to centralize, standardize, and optimize contracting processes. Our solution increases transparency and collaboration throughout the contract lifecycle, resulting in improved productivity and accountability. Use it to securely manage all your contracts in a centralized database, create custom workflows by contract type, and comply with changing healthcare regulations.

### TractManager's CARE:

CARE is our credentialing, privileging, and enrollment software solution. Our CARE software includes dashboard-driven provider onboarding workflows, automated primary source verifications, comprehensive provider enrollment functionality, and robust reporting capabilities.

### Our integrated Provider Management solution helps health systems:

- Streamline and automate critical business processes.
- Accelerate provider onboarding.
- Recover potentially lost revenue by decreasing contracting and onboarding time frames.
- Reduce credentialing-related claim denials and edits.
- Improve provider satisfaction and, by extension, quality of patient care.
- Mitigate legal, compliance, and financial risks.

TractManager is the nation's first Credentialing Verification Organization (CVO) with an integrated Contract Lifecycle Management solution to achieve NCQA Accreditation in Credentialing.

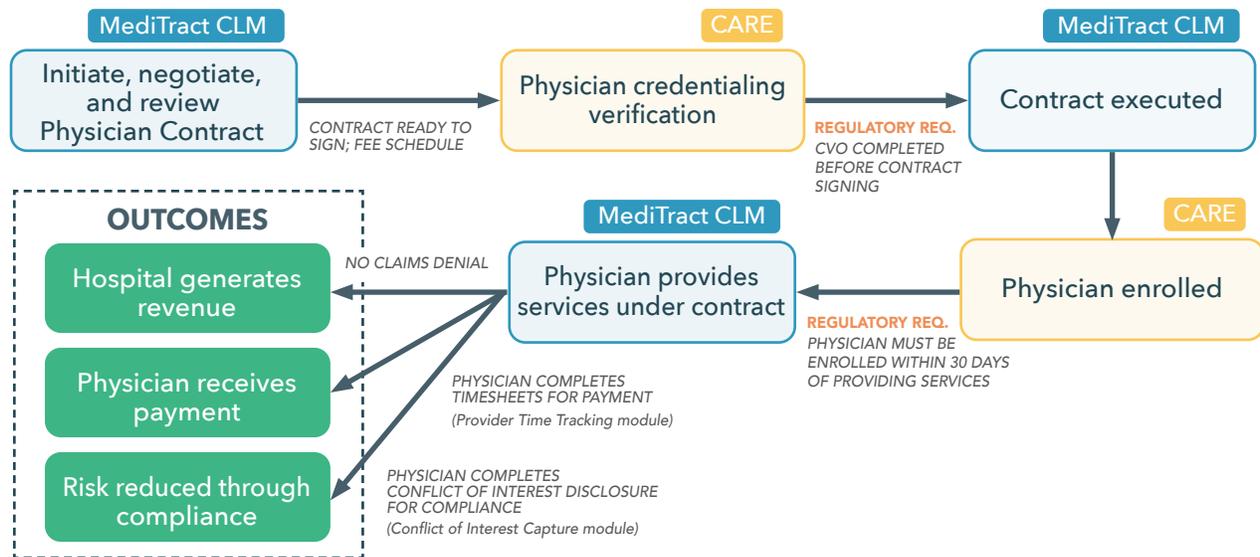

How Can We Help You?

## Two Powerful Technologies. One Provider Management Experience.

This integration effectively digitizes provider contracts and monitors critical dates, terms, and notifications. It automates downstream triggers such as initiating credentialing, finalizing contracting, terminating contracts, and submitting timely provider notifications.

Because data is validated at the source, changes in provider credentialing can be fed back into contract management workflows and reports, allowing real-time review and corrections. This integration speeds up the entire provider contracting and onboarding process so providers can start seeing patients and getting reimbursed sooner.

## Extend Your Solution with Provider Analytics

Obtain real-time insights into your provider contracts with TractManager's Provider Analytics. Scan your contract data housed within MediTract CLM, the gold standard in healthcare contract lifecycle management, to discover actionable insights on all provider contracts. Provider Analytics identifies contract variability that causes compliance concerns and uncovers opportunities to standardize compensation across physician agreements. Analyzing the key terms and clauses in provider contracts allows you to govern your provider relationships better, effectively manage physician total compensation, comprehend your total responsibility during a merger or acquisition, and ensure compliance with regulatory requirements associated with physician compensation.

# \$100,000

Every month enrollment is delayed, physician practice groups and health systems lose an average of \$100,000 for a single primary care provider. For specialty care, the losses are even more staggering at \$300,000 per physician, per month.
